The organization of joint control in the check points on the Ukrainian - Moldavian state border (Transdniestrian factor). - Tiraspol, 2009. - 176 p.

The present monograph is prepared within the framework of research of the question of administrative - legal regime of the customs activity of Transnistria - the subject of international law not vested with international legal personality. In the work all problematic, dynamics and features of the organization of joint control in the check points on the Ukrainian - Moldavian border is considered in detail. The research material contains a systematized analysis of the facts connected with the work of expert groups of Transnistria, Ukraine, Moldova and customs experts of Transnistrian settlement.

It is emphasized serious contradictions between the norms of the international customs and a commercial law, national legislation of Ukraine, Moldova, caused by the artificial change of regime of the customs activity of Transdniestrian Moldavian Republic in counterbalance to the international practice and international standards.

The analyzed Molova-Transnistrian and the Moldova-Ukrainian agreements in customs sphere, analytical materials, projects of the State Customs Committee of Transdniestria and the Moldavian customs, expert conclusions and other documents are investigated and represented to public attention in present work for the first time.

For the customs experts, lecturers, post-graduate students, students, whose research object is connected with investigation of customs relations with states not granted with international legal personality.
